

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## PRIEST LAKE SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
1	Pole Trap	Pts. Govt. Lots 3, 4	4	63N/4W	480	200 M
		Pts. S2NW, Pts. SW	4	63N/4W		2000 Cedar Poles
		Pts. Govt. Lots 1, 2	5	63N/4W		
		Pts. S2NE, Pts. SE	5	63N/4W		
		Pts. NE	8	63N/4W		
		Pts. NW	9	63N/4W		

This sale is located in the Trapper Creek drainage approximately 25 air miles north of Coolin, Idaho. Cedar Poles, associated sawlogs and cedar products will be harvested. The entire sale will be tractor skidded. Approximately 2.0 miles of spur road will be reconstructed, and these same roads will be closed upon completion of sale related activities. Class II streams are present.

2	East Caribou	Pts. S2	26	63N/4W	150	1,000 M
		Pts. SESE	27	63N/4W		
		Pts. NENE, Pts. S2NE	34	63N/4W		
		Pts. SENW, Pts. E2SW	34	63N/4W		
		Pts. N2SE	34	63N/4W		
		Pts. NWNE, Pts. NENW	35	63N/4W		
		Pts. W2NW	35	63N/4W		

This sale is located approximately 20 air miles north of Coolin, Idaho in the Caribou Creek drainage. A combination of shelterwood, group selection, small clearcuts (3-5 acres) and commercial thin harvest prescriptions will be applied to this stand. Tractor skidding and harvester/forwarder systems will be required. Approximately 0.3 mile of spur road will be constructed and 0.2 mile of spur road will be reconstructed. These same roads will be closed upon completion of sale related activities. Both Class I and Class II streams are present.

3	Flying Bear	Pts. NE, Pts. NENW	10	61N/4W	150	1,000 M
		Pts. Govt. Lot 1	10	61N/4W		
		Pts. S2NW, Pts. SW	10	61N/4W		
		Pts. N2NW, Pts. SENW	15	61N/4W		
		Pts. Govt. Lot 1	16	61N/4W		

This sale is located approximately 12 air miles north of Coolin, Idaho in the Bear Creek drainage. A combination of shelterwood, seed tree and group selection harvest prescriptions will be applied to this stand. The entire sale will require helicopter skidding. Class II streams are present.

4	Roothaan	Pts. Govt. Lots 1, 2, 3, 4	4	60N/3W	250	2,500 M
		Pts. Govt. Lots 1, 2, 3, 4	5	60N/3W		
		Pts. E2	32	61N/3W		
		Pts. W2	33	61N/3W		

This sale is located approximately 9 air miles northeast of Coolin, Idaho in the Hunt Creek drainage. A combination of shelterwood, commercial thin, and group selection harvest prescriptions will be applied to this stand. Tractor skidding and line skidding with multispan capabilities will be required with this sale. Approximately 3.0 miles of spur road will be constructed with this sale, and these same roads will be closed upon completion of sale related activities. Class II streams are present.

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## PRIEST LAKE SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
5	Cat Hunt	Pts. Govt. Lots 1, 2	11	60N/4W	300	2,500 M
		Pts. E2SW, Pts. SE	11	60N/4W		
		Pts. S2	12	60N/4W		

This sale is located approximately 7 air miles northeast of Coolin, Idaho in the Hunt Creek drainage. A shelterwood harvest prescription will be applied to this stand. Line skidding with multispan capabilities will be required. Approximately 1.0 mile of spur road will be constructed, 1.0 mile of spur road will be reconstructed and 0.5 miles of main road will be improved. Approximately 5.0 miles of road will be closed and have the culverts removed off of the sale area. Both Class I and Class II streams are present.

6	Camels Hump	Pts. Govt. Lots 2, 3	30	60N/3W	120	1,250 M
		Pts. S2SE	24	60N/4W		
		Pts. NE, Pts. NESE	25	60N/4W		

This sale is located approximately 4 air miles northeast of Coolin, Idaho in the Fenton Creek and Soldier Creek drainages. A combination of shelterwood, seed tree, and group selection harvest prescriptions will be applied to this stand. The entire sale will be tractor skidded. Approximately 5.0 miles of secondary and 2.0 miles of spur road will be opened and improved with this sale. Class II streams are present.

7	North Soldier	Pts. Govt. Lots 1, 2	2	59N/4W	200	2,000 M
		Pts. NE, Pts. SESW	35	60N/4W		
		Pts. SE	35	60N/4W		
		Pts. SWNE, Pts. E2NW	36	60N/4W		
		Pts. SWNW, Pts. N2SW	36	60N/4W		
		Pts. SWSW	36	60N/4W		

This sale is located approximately 3 air miles northeast of Coolin, Idaho in the Soldier Creek drainage. A combination of shelterwood, seed tree, and clearcut harvest prescriptions will be applied to this stand. Tractor skidding, line skidding and helicopter skidding will be required. Approximately 1.4 miles of spur road will be constructed, 1.5 miles of secondary road will be improved and 1.3 miles of spur road will be opened and improved. The new spur roads will be closed upon completion of sale related activities. Both Class I and Class II streams are present.

8	West Rim	Pts. SW	25	59N/4W	200	1,500 M
		Pts. SE	26	59N/4W		
		Pts. E2E2	35	59N/4W		
		Pts. NW, Pts. W2SW	36	59N/4W		

This sale is located approximately 2 air miles southeast of Coolin, Idaho in the North Fork East River drainage. A combination of shelterwood and seed tree harvest prescriptions will be applied to this stand. Tractor and line skidding with multispan capabilities will be required. Class II streams are present.

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## PRIEST LAKE SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
9	Jungle Up	Pts. Govt. Lots 3, 4	3	58N/3W	200	1,500 M
		Pts. S2NW, Pts. SW	3	58N/3W		
		Pts. Govt. Lots 1, 2	4	58N/3W		
		Pts. S2NE, Pts. SW	4	58N/3W		

This sale is located approximately 4 air miles southeast of Coolin, Idaho in the Middle Fork East River drainage. A combination of shelterwood, seed tree, overstory removal, and group selection harvest prescriptions will be applied to this stand. Tractor skidding and line skidding with multispan capabilities are required. Approximately 0.7 mile of spur road will be constructed, 2.0 miles of spur road will be reconstructed and 3.5 miles of spur road will be improved. The new and reconstructed roads will be closed upon completion of sale related activities. Class II streams are present.

This sale is located approximately 4 miles south of Naples, Idaho, in the Sand Creek and Deep Creek drainages. Selective logging will remove cedar poles using tractor and line skidding methods. Approximately 1.3 miles of secondary road will be constructed, approximately 3.5 miles of road will be reconstructed to secondary standards, and 14 miles of existing road will be opened and improved. Class II streams are present within the sale area. There are no Class I streams on the sale area, but logging will occur adjacent to Bloom Lake.

Additional small volume sales:

	200	300 M
TOTALS:	1,605	5,200 M 400 M Pulp 2,000 Poles

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## PEND OREILLE SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
1	North Springdale	Pts SESE	35	56N/5W	390	2,000 M
		Pts W2SW	36	56N/5W		
		Pts SW	1	55N/5W		
		Pts Govt. Lot 1 & 2	2	55N/5W		
		Pts S2NE	2	55N/5W		
		Pts NENE, Pts SE	11	55N/5W		
		Pts NWNW	12	55N/5W		

This sale is located approximately 2 air miles south of Priest River, Idaho. Harvest prescriptions are designed to sanitize and thin a mixed species stand consisting of both small and large sawtimber. The stand varies in vigor and condition. Tractor and line skidding logging is planned. Approximately 1.5 miles of spur road will be reconstructed. Class I and II streams are present within the sale area.

2	Carey Thin	Pts NWNE, Pts W2	16	55N/4W	327	1,000 M
		Pts NWSE	16	55N/4W		

This sale is located approximately 6 air miles southeast of Priest River, Idaho. Harvest prescriptions are designed to sanitize and commercially thin a mixed species stand of small sawlogs that are in an overstocked condition. Tractor and line skidding logging is planned on all units. No road construction is anticipated. Class II streams are present within the sale area.

3	Idaho Hill	Pts Govt. Lots 1-4, Pts SE	36	56N/6W	304	1,000 M
---	------------	----------------------------	----	--------	-----	---------

This sale is located approximately 2 air miles south of Oldtown, Idaho. Harvest prescriptions are designed to cut lodgepole pine and thin other species. Openings greater than 10 acres may be created in areas of lodgepole pine. Tractor logging is planned on all units. Approximately 1.0 mile of spur road is planned for reconstruction. No streams are present within the sale area.

4	Middle Fork Fox Creek	Pts Govt. Lots 3, 4, 5, 6	1	57N/4W	600	3,000 M
		Pts Govt. Lots 1-8	2	57N/4W		
		Pts Govt. Lots 9, 10, 17, 18, 19	3	57N/4W		
		Pts Govt. Lots 3, 4	31	58N/3W		
		Pts E2SW, Pts SE	31	58N/3W		
		Pts S2	36	58N/4W		

The sale is located approximately 9 air miles northeast of Priest River, Idaho. Harvest prescriptions are designed to sanitize and commercially thin mature sawtimber stands. Tractor and line skidding is planned on the harvest units. Unit 1 will be harvested using a combination of seed tree and overstory removal prescriptions. All other units will be harvested using a combination of group selection and commercial thinning methods. Approximately 2.6 miles of secondary road will be reconstructed and 6.5 miles of spur road will be opened and improved. Class I and II streams are present within the sale area.

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## PEND OREILLE SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
5	Outer Crazy Creek	Pts SE	27	57N/4W	280	1,300 M
		Pts S2	33	57N/4W		
		Pts NE	34	57N/4W		
		Pts Govt. Lots 5, 7	35	57N/4W		
		Pts NWNW	35	57N/4W		

The sale is located approximately 4 air miles northeast of Priest River, Idaho. Harvest prescriptions are designed as an overstory removal of over-mature sawtimber in unit 1 (Section 33) and a sanitation harvest of over-mature sawtimber in units 2-3 (Sections 27, 34, 35). Tractor logging is planned on all units. Approximately 3.0 miles of spur road will be reconstructed and 0.8 mile of spur road will be opened and improved. Class II streams are present within the sale area.

TOTALS:	2,301	10,000 M

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## PEND OREILLE SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
1	Chilco OSR	Pts. Govt. Lot 2, S2NE	16	52N/3W	225	1,400 M
		Pts. SENW	16	52N/3W		
		Pts. Govt. Lots 3 & 4, E2SW	16	52N/3W		
		Pts. SE	16	52N/3W		

This sale is located approximately 1 mile southeast of Chilco, Idaho. The harvest prescription is designed to be an overstory removal. Both tractor and line skidding are planned for this sale. Approximately 0.1 mile of spur road is proposed to be reconstructed, with an additional 6.0 miles of spur road to be opened and improved. Several Class II streams are present within and adjacent to the sale area. There are no Class I streams adjacent to the sale area.

2	North Fork Mica	Pts. SWNE	16	49N/5W	95	1,100 M
		Pts. SENWNE	16	49N/5W		
		Pts. S2NE	16	49N/5W		
		Pts. SE	16	49N/5W		

This sale is located approximately 9 air miles south of Post Falls, Idaho. A shelterwood prescription is planned for the sale area. Both skyline and tractor skidding methods are planned for this sale. Approximately 3.0 miles of spur road is proposed to be constructed and 8.0 miles of spur road is proposed to be opened and improved. There may be one Class I stream on the sale area. This stream is the head waters of the North Fork of Mica Creek. There are two Class II streams present on the sale area. The North Fork of Mica Creek is a 303(d) listed stream.

3	Shove Creek	Pts. E2SW	9	52N/5W	400	1,200 M
		Pts. SE	9	52N/5W		
		Pts. S2SW	10	52N/5W

The sale is located approximately 3 air miles south of Kingston, Idaho in the Hunt Gulch drainage. A combination of shelterwood, seed tree, group selection, and clearcut harvest prescriptions will be applied to this mature stand. Both tractor and skyline skidding systems will be employed, including the potential use of elevated tailholds, extended (tagline) tailholds, and intermediate supports. Approximately 0.4 mile of spur road will be constructed and 4.0 miles of mainhaul will be surfaced with pit run material. Approximately 4.0 miles of mainhaul and 8.5 miles of secondary road will be opened and improved. Class II streams are present.

Additional small volume sales: 200 245 M

TOTALS: 957 9,000 M  
45 M Cedar Prod.

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## ST. JOE SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
1	Omega	Pts. SWNE	16	46N/1W	210	4,300 M
		Pts. SW	16	46N/1W		70 M Cedar Prod.
		Pts. NWSE	16	46N/1W		
		Pts. SWSE	16	46N/1W		
		Pts. Govt. Lot 14	16	46N/1W		

This sale is located approximately 5 miles northeast of St. Maries, Idaho in the St. Joe River drainage. Several Class II streams flow through the sale area. Silvicultural prescriptions include a clearcut unit of approximately 83 acres and 115 acres of shelterwood. Both tractor and skyline skidding systems are required including the potential use of elevated tailholds and forwarding. Developments include constructing approximately 2.5 miles of secondary road and approximately 0.2 mile of spur road. In addition, approximately 4.2 miles of the Child's Creek Cooperative Road will be resurfaced with crushed rock.

2	Mica Basin Pole	Pts. NE	30	45N/3E	550	200 M
		Pts. E2NW	30	45N/3E		4,500 Cedar Poles
		Pts Govt. Lots 1-4	30	45N/3E		200 M Cedar Prod.
		Pts E2SW	30	45N/3E		
		Pts N2SE	30	45N/3E		
		Pts SWSE	30	45N/3E		

This sale is located approximately 5 air miles southeast of Calder, Idaho in the Mica Creek drainage. Jim Green Creek, a Class I stream, and several unnamed Class II streams flow through the sale area. This sale will remove cedar poles using both tractor and skyline skidding methods. Elevated tailholds, intermediate supports, and extended skidding distances will be required. Developments include approximately 11.4 miles of secondary road opening and improvements, which will include spot rock.

3	Trapper Scott OSR	Pts. SWNE, Pts. NWSW	2	41N/4E	260	6,600 M
		Pts. Govt. Lots 1 & 2	3	41N/4E		565 M Cedar Prod.
		Pts. S2NE	3	41N/4E		
		Pts. Govt. Lot 3, Pts. SENW	3	41N/4E		
		Pts. N2SW, Pts. N2SE	3	41N/4E		
		Pts. SESE	3	41N/4E		
		Pts. SWSE	34	42N/4E		

This sale is located approximately 14 air miles southeast of Clarkia, Idaho in the Floodwood Creek drainage. Several unnamed Class II streams flow through the sale area. The sale will remove the overstory using tractor and skyline yarding methods. Developments include open and improving approximately 9.1 miles of secondary road and abandoning 0.6 mile of secondary road.

4	Rooney Creek	Pts.	22	41N/5E	162	4,900 M
		Pts. N2	23	41N/5E		150 M Cedar Prod.
		Pts. NW	27	41N/5E		

This sale is located approximately 22 air miles southeast of Clarkia, Idaho in the North Fork of the Clearwater River drainage. Silvicultural prescriptions include a clearcut unit of approximately 54 acres and approximately 108 acres of shelterwood. Both tractor and skyline skidding will be required. Secondary road developments include approximately 7.0 miles of open and improvement and approximately 2.0 miles of abandonment. There are several Class II streams within the sale area.

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## ST. JOE SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
5	South Carpenter	Pts. SW	15	43N/1W	200	3,200 M
		Pts.	21	43N/1W		100 M Cedar Prod.
		Pts. W2	22	43N/1W		

This sale is located approximately 4 air miles southwest of Fernwood, Idaho in the Carpenter Creek drainage (Class I). Several unnamed Class II streams flow through the sale area. Silvicultural prescriptions include approximately 110 acres of shelterwood and approximately 90 acres of seed tree prescriptions. Both tractor and skyline skidding systems will be employed, including the potential use of elevated tailholds, intermediate supports, and forwarding. Developments include construction of approximately 1.8 miles of secondary road, reconstruction of approximately 2.3 miles of secondary road, and opening and improving approximately 1.3 miles of secondary road.

6	Sportsman Thin	Pts. SWSW	18	45N/1W	270	4,400 M
		Pts. SESW	13	45N/2W		100 M Cedar Prod.
		Pts. S2SE	13	45N/2W		
		Pts. N2	24	45N/2W		
		Pts. SESW	24	45N/2W		
		Pts. SE	24	45N/2W		

This sale is located approximately 5 air miles south of St. Maries, Idaho in the Flat Creek drainage. An unnamed Class I stream is adjacent to the sale area. This sale will be approximately 180 acres of commercial thin and approximately 70 acres of seed tree. Ground based equipment will be used for harvesting with restrictions requiring cut-to-length equipment only. Forwarding trails will be required. Developments include construction of approximately 1.5 miles of secondary road.

7	Last Sawlog	Pts. NWNW	27	41N/4E	177	3,000 M
		Pts. W2NE	27	41N/4E		390 M Cedar Prod.
		Pts. S2NW	27	41N/4E

## PONDEROSA SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
1	Jericho Mountain	Pts. SWNE, Pts. S2NW Pts. N2S2, Pts. SESE	17 17	39N/3E 39N/3E	165	3,800 M

This sale is located approximately 5 miles southeast of Elk River, Idaho. This sale will include an overstory removal on approximately 39 acres, a seedtree prescription on approximately 55 acres, and 2 units that will be clear-cut for a total of approximately 71 acres. Both tractor and line skidding methods will be required. Approximately 0.8 mile of spur roads will be constructed and approximately 6.0 miles of secondary and spur roads will be opened and improved. There are six Class II Streams within the sale area.

2	Lindley-Bonami Pole	Pts. SENE Pts. W2NE, Pts. NW Pts. SW, Pts. N2SE SENE, Pts. NESE Pts. NWSW	20 21 21 9 10	40N/2E 40N/2E 40N/2E 41N/2W 41N/2W	318	500 M 2,900 Poles
---	---------------------	---	---------------------------	--	-----	----------------------

This sale consists of two previously logged units in which cedar poles were reserved. Unit 1 is located approximately 7 miles northwest of Deary, Idaho. Unit 2 is located approximately 2 miles northwest of Elk River, Idaho. In both units, cedar 13 inches diameter breast height and larger will be harvested. Unit 2 also contains approximately 16 acres that were not part of the original harvest in this area. Both tractor and line skidding methods will be required. Approximately 4.9 miles of secondary and spur roads will be opened and improved. There are seven Class II Streams within the sale area, three of which are perennial.

3	Little Sand	Pts. E2SE Pts. W2SW, Pts. SESW, Pts. SWSE Pts. NW, Pts. NWNE	9 9 10 15	41N/2W 41N/2W 41N/2W 41N/2W	150	5,800 M
---	-------------	---	--------------------	--------------------------------------	-----	---------

This sale is located approximately 7 miles north of Deary, Idaho in the Little Sand Creek drainage. This sale will harvest overmature timber consisting of predominately grand fir, Douglas-fir, and cedar. Unit 1 is a seedtree cut of approximately 190 acres favoring western larch, white pine, and Douglas-fir seedtrees. Unit 2 is approximately 60 acres and will be clear-cut, broadcast burned, and planted. This sale will require line and tractor skidding almost equally. Approximately 1.8 miles of spur road will be constructed to access the sale. There are three Class II Streams within the sale area.

4	Corral Creek	Pts. N2SW Pts. SWSW NWNE Pts. N2NW	9 9 16 16	40N/1W 40N/1W 40N/1W 40N/1W	163	3,100 M
---	--------------	---	--------------------	--------------------------------------	-----	---------

This sale is located approximately 1 mile north of Helmer, Idaho. This sale will include a seedtree prescription on approximately 85 acres and 78 acres will be clear-cut in unit 2. The entire sale will utilize ground based skidding methods. Approximately 0.9 mile of spur road will be constructed. There are four Class II Streams within the sale area.

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## PONDEROSA SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
5	Purdue OSR	Pts. S2S2	17	41N/1E	144	1,200 M

	Pts. Govt. Lots 4 & 5	33	44N/5W		

This sale is located in the Mary Minerva McCroskey State Park approximately 15 miles northwest of Pottlatch, Idaho. This sale will be salvage harvested removing dead and dying timber on approximately 248 acres. Both tractor and line skidding methods will be required. Approximately 2.1 miles of spur road will be constructed and approximately 1.8 miles of secondary road will be opened and improved. No streams exist within the sale area.

Additional small volume sales:

	75	300 M
TOTALS:	323	4,180 M

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## MAGGIE CREEK SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
1	Chute	Pts. SESWSE, Pts. SESE	8	39N/4E	147	2,575 M
		Pts. SENW, Pts. NESW	9	39N/4E		
		Pts. E2NWSW, SWNWSW	9	39N/4E		
		Pts. S2SW	9	39N/4E		
		Pts. NWNW	16	39N/4E		

This sale is located approximately 13 miles northwest of Headquarters, Idaho. A seed tree silvicultural prescription will be used to regenerate the site. Both line and tractor skidding will be required. Approximately 1.8 miles of existing secondary road will be surfaced to provide all season access to portions of the sale area. Some specific sites will be reconstructed prior to surfacing. Several unnamed Class II streams are present within the sale area.

2	Upper Rainy	Pts. W2NE, Pts. E2NW	16	37N/4E	300	3,800 M
		Pts. SW, Pts. W2SE	16	37N/4E		
		Pts. NESE, Pts. S2SE	17	37N/4E		
		Pts. NE, Pts. N2SE	20	37N/4E		
		Pts. NW	21	37N/4E		

This sale is located 15 miles east of Orofino, Idaho. Selective, seed tree/shelterwood, and overstory removal silviculture prescriptions will be used. Approximately 270 acres will be tractor skidded and 30 acres will be short span cable skidded. Development work will include 1.1 miles of new spur road construction and 6.5 miles of spur road open and improvement. Several Class II streams are within the sale area.

3	Whiskey Slopes	Pts. SESE	8	37N/4E	170	2,800 M
		Pts. SWSW	9	37N/4E		
		Pts. NWNW	16	37N/4E		
		Pts. N2	17	37N/4E		

This sale is located approximately 14 miles northeast of Orofino, Idaho. This sale will include selective, shelterwood, and clearcut prescriptions of mature stands. Several Class II streams, which are tributaries to Whiskey Creek, are located within the sale area. Development work will include approximately 4.5 miles of new spur road construction and 0.8 mile of spur road reconstruction. The entire sale may be ground skidded.

4	Snake Ridge Road	Pts. S2NE, Pts. SENW	24	38N/4E	366	7,200 M
		Pts. E2SW, Pts. SE	24	38N/4E		
		Pts. W2SW	19	38N/5E		
		Pts. NE, Pts. N2NW	30	38N/5E		

This sale is located approximately 4 miles southwest of Headquarters, Idaho, and will establish a road system in an undeveloped block of state land. The sale will commercially thin an overstocked stand of 50-60 year old sawtimber. Harvest will require both a single-grip and forwarder system, as well as line skidding with distances up to 1,200 feet. Approximately 6.0 miles of new spur road will be constructed, and 2.0 miles existing spur road will be opened and improved. The sale is located within the Snake Creek drainage, part of the Reeds Creek drainage, which is a 303(d) listed stream. TMDL's are currently being developed and implemented for the Reeds Creek drainage.

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## MAGGIE CREEK SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
5	Main Street Commercial	Pts. SWNW, Pts. N2SW	2	38N/4E	250	2,000 M
		Pts. SWSW	2	38N/4E		
		Pts. SENE, Pts. W2SW	3	38N/4E		
		Pts. SE	3	38N/4E		
		Pts. NWNW, Pts. E2NW	10	38N/4E		
		Pts. NESW	10	38N/4E		

This sale is located approximately 5 miles northwest of Headquarters, Idaho. Sale will commercially thin 50-65 year old sawtimber from a previously logged stand. Harvesting requirements will include both a feller buncher and line skidding with distances up to 600 feet. Approximately 3.0 miles of new spur road will be constructed. The sale area has a number of Class II streams present.

6	Olson OSR	Pts. NWNW, Pts. S2NE	11	36N/4E	475	1,555 M
		Pts. W2,	11	36N/4E		
		Pts. N2SE, Pts. SWSE	11	36N/4E		
		Pts. NWNW, Pts. S2NW	12	36N/4E		
		Pts. SW, Pts. W2SE	12	36N/4E		

This sale is located 6 miles west of Pierce, Idaho. The silviculture prescription for the entire sale is an overstory removal. Approximately 365 acres will be tractor skidded and 110 acres will be short span cable skidded. Development work will include 7.5 miles of spur road open and improvement. Several Class II streams are within the sale area.

7	Mill Pond	Pts. NWNW, Pts. N2NW	8	37N/3E	113	2,045 M
---	-----------	----------------------	---	--------	-----	---------

This sale is located approximately 10 miles northeast of Orofino, Idaho, within the headwaters of Canyon Creek. Several Class II streams are present within the sale area. This sale will use a seed tree prescription to harvest over-mature and mature trees from a large sawtimber stand. The entire sale is suitable for tractor skidding. Reconstruction of 2.5 miles of existing spur road will provide sale access.

8	Bartlett Poles	NWSE	24	38N/3E	120	300 M
		NWNE, SESW	26	38N/3E		1,700 Poles

This sale is located approximately 16 miles northeast of Orofino, Idaho, in the White Creek and north fork of White Creek drainages. Pole quality cedar will be selectively harvested from three (3) isolated forty acre blocks of mixed species stands. The majority of this sale will require line skidding but there will be a small amount of tractor skidding. Spur road development will include approximately 1.0 mile of new construction. There are several Class II streams within the sale.

9	Ove Creek	Pts. SESW, Pts. S2SE	29	38N/2E	354	2,815 M
		Pts. NE, Pts. E2NW	32	38N/2E		
		Pts. SENE, Pts. NW	33	38N/2E		

This sale is located approximately 7 air miles north of Orofino, Idaho. Ove Creek, an intermittent Class II stream, forms a portion of the east boundary of the sale and several unnamed intermittent Class II streams originate in the sale. Seed tree and shelterwood prescriptions will be applied to a mature stand. Approximately 60 acres will require line skidding with distances up to 1,500 feet. The remaining 294 acres may be tractor logged. Development work will include 2.5 miles of new spur road construction and 1.2 miles of spur road open and improve.

Additional small volume sales:

300 1,570 M

TOTALS: 2,595 26,660 M

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## MAGGIE CREEK SUPERVISORY AREA

1,700 Cedar Poles

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
1	Space Divide Pole	Pts. E2NE	32	36N/5E	90	100 M
		Pts. N2NW, Pts. SWNW	33	36N/5E		1,800 Poles

This sale is located approximately 5 miles northeast of Weippe, Idaho. Intermittent Class II tributaries of Heywood Creek and Space Creek drain from the sale area which then flow into Jim Ford Creek, a Class I 303(d) listed stream. This sale will harvest pole quality cedar trees and minor amounts of dying mixed species, using a seedtree prescription to naturally regenerate the stand. The entire sale can be tractor logged to existing roads. Approximately 1.5 miles of spur road will be opened and improved.

2	Lunch Saddle Seed	Pts. N2SW	1	34N/5E	181	1,800 M
		Pts. S2NE, Pts. SENW	2	34N/5E		
		Pts. E2SW, Pts. N2SE	2	34N/5E		
		Pts. SWSE	2	34N/5E		

This sale is located approximately 8 miles southeast of Weippe, Idaho. Class II streams within the sale are tributaries to Musselshell Creek and Crane Creek which drain into Lolo Creek, a Class I 303(d) listed stream. The sale area previously had cedar poles removed and this entry will remove mature, overmature, and defective trees utilizing a seedtree silvicultural treatment. Logging systems will include tractor and short-span line skidding. Spur road development includes approximately 2.0 miles of reconstruction and surfacing, and 2.0 miles of open and improve.

3	Southern Rock	Pts. NW, Pts. N2SW	14	34N/5E	300	6,000 M
		Pts. SWSW	14	34N/5E		
		Pts. E2, Pts. SWSW	15	34N/5E		

This sale is located approximately 9 miles southeast of Weippe, Idaho. Intermittent Class II tributaries of Rock Creek and Lolo Creek drain from the sale area into Lolo Creek, a Class I 303(d) listed stream. This sale will harvest mature and overmature sawtimber with a combination of seedtree and clearcut prescriptions. One 70-acre clearcut unit is proposed. The entire sale can be tractor skidded. This sale will construct approximately 2.3 miles of spur road and open and improve 2.0 miles of spur road. Approximately 5.0 miles of main haul road will be resurfaced.

4	Backside Butte	Pts. NE, Pts. N2NW	12	33N/5E	228	1,800 M
		Pts. SENW, Pts. N2SE	12	33N/5E		
		Pts. SENE	12	33N/5E		

This sale is located approximately 12 miles east of Kamiah, Idaho. Numerous Class II intermittent streams within the sale area are tributaries to Yakus Creek which then drains into Lolo Creek, a Class I 303(d) listed stream. The sale will be harvested using both a skyline system and tractor skidding. Timber harvest will utilize a mix of thin-from-below and commercial thin prescriptions. Approximately 1.5 miles of new spur road will be constructed and approximately 1.5 miles of spur road will be opened and improved.

5	Still Burn Commercial	Pts. N2SW, Pts. SESW	23	33N/5E	313	1,700 M
		Pts. SE	23	33N/5E		
		Pts. SWNE, Pts. SENW	24	33N/5E		
		Pts. SW, Pts. W2SE	24	33N/5E		

This sale is located approximately 10 miles northeast of Kooskia, Idaho. Minor Class II streams are located in and adjacent to the sale area, which drain into Suttler Creek, a Class I stream. The sale prescription is a commercial thin. Harvest methods will involve line skidding and mechanical harvesting systems, including conventional and single grip harvesting equipment. Approximately 3.0 miles of new spur road will be constructed with this sale.

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## MAGGIE CREEK SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME

		Pts. W2NE, Pts. NW	36	24N/ 1E		
		Pts. N2SW, Pts. NWSE	36	24N/ 1E		

This sale is located approximately 2 air miles southeast of Riggins, Idaho in the Hailey Creek drainage. The sanitation salvage prescription will remove some overstory and commercial thin the stand, to improve the growing conditions, and reduce the amount of dwarf mistletoe disease. Both line skidding and tractor/jammer logging methods will be used. Approximately 2.0 miles of spur road will be constructed. Hailey Creek and other Class II streams are present.

3	North Placer	Pts. S2	9	17N/ 3W	476	4,480 M
		Pts. SWSW	10	17N/ 3W		
		Pts. NWNW	15	17N/ 3W		
		Pts. N2	16	17N/ 3W		

This sale is located approximately 16 air miles northwest of Council, Idaho in the Hornet Creek watershed. Seedtree/shelterwood prescriptions will be used on approximately 343 acres and a selective harvesting (leaving an un-even aged stand) prescription will be used on approximately 133 acres. Both line skidding and tractor/jammer logging methods will be used. Approximately 1.3 miles of spur road will be constructed and approximately 2.0 miles of spur road will be reconstructed. North Creek forms the north boundary and Placer Creek forms the south boundary. Both of these streams are Class I streams. Several Class II intermittent streams are present within the sale area.

4	South Johnson	Pts. W2NW, Pts. N2SW	5	16N/ 2W	229	4,059 M
		Pts. SWSW	5	16N/ 2W		
		Pts. E2, Pts. E2NW	6	16N/ 2W		
		Pts. SESW	6	16N/ 2W		

This sale is located approximately 9 air miles west of Council, Idaho in the Johnson Creek watershed. A seed tree cutting prescription will be used on all 229 acres. Tractor/jammer logging methods will be used on the entire sale. Approximately 1.0 miles of spur road will be constructed and approximately 2.5 miles of spur road will be reconstructed with this sale. Johnson Creek (Class I) forms the northern boundary and several intermittent Class II streams are present.

# PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## PAYETTE LAKES SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
5	Jughandle	Pts. S2SE	5	17N/ 4E	546	5,613 M
		Pts. E2	8	17N/ 4E		
		Pts. W2W2, Pts. SENW	9	17N/ 4E		
		Pts. E2SW	9	17N/ 4E		
		Pts. NWNW	16	17N/ 4E		
		Pts. NE, Pts NWSE	17	17N/ 4E		

This sale is located approximately 7.5 miles southeast of McCall, Idaho. The harvest will remove diseased and defective timber, leaving mostly seral species. An over mature lodgepole pine stand (approximately 36 acres) will be clear-cut and broadcast burned to promote conditions for desirable regeneration. Tractor and skyline logging methods are necessary. Development includes approximately 0.9 mile of spur road construction. Improvement work will be accomplished on approximately 5.7 miles of secondary road and 1 mile of spur road. Approximately 5.4 miles of secondary road will be surfaced with crushed rock. Approximately 0.3 mile of spur road will be abandoned. The sale area is dissected by several Class II streams. Jug Creek borders the north portion of the sale, the lower section is being treated as a Class I stream.

6	Sloans	Pts. W2E2, Pts. W2	1	16N/ 4E	920	1,381 M
		Pts. NENE	12	16N/ 4E		
		Pts. S2SW, Pts. SWSE	36	17N/ 4E		

This sale is located 8.5 miles east of Donnelly, Idaho. Harvest of timber in this sale area will remove the remaining overstory from areas where the trees are generally young and healthy, thin young stands that have reached commercial size and remove diseased, defective and overmature trees from all of the sale area. Approximately 150 acres will require skyline logging, the remainder can be logged with tractor/jammer. Approximately 0.8 mile of new secondary road will be constructed to relocate road that does not meet current standards and 3.5 miles of secondary road will be reconstructed. Several perennial and intermittent forks of Kennally Creek, and some tributaries to Sloans Creek, all Class II, run through the sale area.

TOTALS:	2,811	21,000 M

# DRAFT PROPOSED TIMBER SALES PLAN

July 1, 2003 – June 30, 2004

## SOUTHWEST IDAHO SUPERVISORY AREA

SALE NO.	SALE NAME	SUBDIVISION	SECTION	T & R	ACREAGE	APPROXIMATE VOLUME
1	Grayback Patches	Pts. Govt. Lots 3, 4, 5, & 6	3	5N/5E	560	3,310 M
		Govt. Lot 1 & 8, Pts. S2NE	4	5N/5E		
		Pts. NESE	4	5N/5E		
		Pts. SWNW, Pts. E2SW	9	5N/5E		
		Pts. SE	9	5N/5E		
		Pts. SWNE, Pts. S2NW	10	5N/5E		
		Pts. S2	10	5N/5E		
		Pts. N2N2	15	5N/5E		
		Pts. NENE	16	5N/5E		

This sale is located approximately 4 miles southwest of Idaho City, Idaho. Grayback Patches is a combination of commercial thinning and sanitation harvest in the Thorn Creek block. Several openings less than 10 acres in size will be created in order to sanitize dwarf mistletoe infection pockets. This sale is located in Grayback Gulch, New York Gulch and Greenland Gulch. Grayback Gulch Creek is a Class I stream because it is the water source for the Forest Service campground at the mouth of Grayback Gulch. The remaining streams on the sale area are Class II. Approximately 3.9 miles of secondary road construction is planned with this sale. This sale will be harvested with a combination of skyline yarding (60%), off-road jammer skidding and tractor skidding.

2	Hardrock	Govt. Lot 1, Pts. Govt. Lot 2	1	5N/5E	567	3,520 M

		Pts. W2SW, Pts. SESE	12	5N/5E		
		Pts. NENE	13	5N/5E		

This sale is located 3 to 4 miles south to southeast of Idaho City, Idaho. Hardrock is a combination of commercial thinning and sanitation harvest in the Thorn Creek block. Several openings less than 10 acres in size will be created in order to sanitize dwarf mistletoe infection pockets. This sale is located in the Grayback Gulch, Dry Creek, and Pine Creek drainages which are tributaries to Mores Creek and the Boise River in Lucky Peak Reservoir. Pine Creek is a Class I stream. The remaining streams on the sale area are Class II. Approximately 1.8 miles of spur road will be constructed and 0.2 mile of spur will be reconstructed with this sale. This sale will utilize combinations of helicopter yarding (40%), skyline yarding (40%), off-road jammer skidding and tractor skidding.

3	Hill	Pts. SENE, Pts. E2SW,	16	8N/3E	204	2,300 M
		Pts. SE	16	8N/3E		

This sale is located approximately 9 miles northeast of Horseshoe Bend, Idaho. It will utilize an existing road system built by previous timber sales. This sale will combine commercial thinning and shelterwood cutting with minor amounts of overstory removal. A few small openings less than 10 acres in size will be created to convert grand fir to seral species and by sanitizing small patches of dwarf mistletoe infected Douglas-fir. There are no Class I streams present but there are Class II streams on the sale area. The entire sale can be harvested by off-road jammer and tractor harvest systems.
